About me

I am a creative and critical thinking person, my passion is Artificial Intelligence.

Skills

NLP, LLM, Prompt Engineering

Machine learning, Deep learning

React, Redux, Java

R, Python, C&C++, Shell

Agile&Scrum, QA

Analysis, Visualization, CyberSecurity

MongoDB, GCP, Hive, SPSS, SQL

Window, Linux, Tex, Office, Git

Scikit, Pandas, Tableau, Vertex, Torch

Pycharm, IntelliJ

Positive★4.0 Leading★4.5
Management★4.5 Collaborating★4.5

(*)[The skill scale is from 0 (Fundamental Awareness)
to 6 (Expert).]

Summary

- Resourceful of MLOps, AIOps proficient with Python, GCP, AWS, NodeJS, Mongo, DataBricks, Tensorflow, FastAPI.
- Experience of leading the Research and Development of AI/ML applications, data visualizing, analyzing, forecasting. Creatives and Passionate in Innovation. Becoming an AI expert

Experience

4/2023-9/2023

Senior Machine Learning Engineer at Stay22

Canada

Research and develop the application for improving performance of booking via blog using Tensorflow, Opencv, Pycharm, Elmo, Torch, Spacy, GPT-3, GCP, Vertex

- Lead the system design, get your hands dirty and write code, and ultimately deploy big data and machine learning services. These services define the foundation of R&D processes, supporting science, product development and production
- Work with Docker, FastAPI, PostMan, GPT-3, GCP, Vertex, LLM,PaLM2, Generate AI, Grafana, kedro (ds), imagine, chirp, codey, Prophet
- Work on MLOps with full pipeline

Achievement:

- Create the automatically recognize the entities on the Blog to classify the Hotel Detail Page and Pin Search Result Page which is expected to increased the conversation rate to 20%
- Deploy the location normalization and location extraction service to clean the report from mixpanel which helps much the management system
- Deploy the commission forecasting service to help partners, manager, and supplier to see the potential commission with high accuracy

Problem: R&D team is suspension after 5 months because it is too early for a startup like Stay22

4/2022-4/2023

Lead of Machine learning specialist at JunctionAI

USA

Research and develop the application for marketing using Tensorflow, Opencv, TFX, Pycharm, Elmo, Torch, Spacy

- Establish high standards and share knowledge in performance, scale-up, enterprise system architecture, and engineering best practices with ML pipeline;
- Establish and maintain collaboration with research and business teams to converge on the best solutions;
- Extending prototypes into fully functional, polished solutions ready for internal and/or external use;
- Work with Docker, Tilt, Flask, API, Mock, GPT-J, Clarifai, AWS, S3, Azure, Pycharm, Google Vision, GridSearch, Neuralprophet, Prophet, GCP, MLOps

Achievement:

- Create the automatically generate content for listing on amazon, auto remove background and extract text from the photo
- Deploy the customer sentiment analysis with 85% accuracy and 95% confidence interval, crawl data from Twitter for Federal Project
- Deploy the Machine learning model to engage and analysis the Election campaign such as Nolan chart analysis, Sentiment analysis, Co-occurrent network analysis, and WordCloud analysis.

Problem: The products cannot compete with ChatGPT, struggling with funding

(*)[The skill scale is from 0 (Fundamental Awareness) to 6 (Expert).]

4/2022-11/2022 Data Scientist Postdoc at Desjardin Bank (Intern)

Canada

Research and develop the Ontology Knowledge Base for smart banking dialogue system

- Analysis the Banking product, service for training the smart banking dialogue model
- Deploy the Chatbot based on Ontology Knowledge Base (answer question What, Who, When, Where, How and Why)
- Do research at Desjardin Bank and report to both Desjardin and Université du Québec à Trois-Rivières

Achievement:

- Get 140k CAD fund from Mitacs + Desjardin bank for the project
- Problem: Project fund (140k) suspension after 6 months caused prototype product which cannot compete with ChatGPT

3/2018-4/2022

Researcher on NLP at Lincs lab, École de technologie supérieure
Canada

Research the application for learning using Tensorflow, Opencv, Pycharm, Elmo, Torch, Spacy

- Natural Language Processing in a smart Dialog system
- PhD thesis: Natural Language Generation for Intelligent Tutoring System

Achievement:

- Obtained the fund from Mitacs and Korbit for 3 years (80K) with the project "Natural Language Generation for Intelligent Tutoring System"

7/2018-11/2021 Machine Learning Engineer at Korbit

Canada

Research the application of generating the Natural language for the Intelligence Tutor System

- Generate natural language contents (Hints, questions, answers)
- Create the API with Microservices for ML applications
- Work with platforms: Rasa, Elmo, Torch, Tensor-flow, Spacy, OpenAI
- Pre-process data: imbalance, unicode, symbol, math, etc.,
- Process data with CUDA, Multiple processors
- Work with AWS, Colab, Google cloud , notebook jupyter

Achievement:

- Published two conferences and one journal papers
- Run and analysis experiment with more than 1000 employee from FPT and integrate the hints to the system which help users' knowledge gain 43 %
- Became the coordinator of running pilot project with one of the biggest ICT company in Vietnam (FPT)
- Work with Korbit since It has only 5 members (much of achievement for innovation startup: CB Insights' AI 100, Korbit Technologies Raises almost 5M)

10/2017-2/2018 Science Research Analysis at Bibliomondo

Canada

Research Shazam Image project and Develop the User Interface of the Timesheet project.

- Research the application by using Python, and Android Studio, Webstorm, IntelliJ IDEA (e.g., Research the Object recognition and Hologram module)
- Create the language locale and UI module by using Reactjs, Momentjs, Redux-sagas at Timesheet project

Achievement:

- Created the prototype of Object Recognition and Hologram module
- Finished the Timesheet project with only 1 member (the project managed the time of user working with both languages French and English)

Problem: Project fund (60K) suspension after a few months caused prototype product

About me

I am a creative and critical thinking person, my passion is Artificial Intelligence.

Skills

Positive★4.0 Leading★4.5
Management★4.5 Collaborating★4.5
(*)[The skill scale is from 0 (Fundamental Awareness) to 6 (Expert).]

- 10/2016-6/2017 Senior Software Engineer at Renesas Vietnam
Apply OS patches and upgrades on a regular basis. Configure/add new services as necessary and maintain a big system based on big data analysis.
 - Upgrade and configure system software that supports infrastructure applications or Asset Management applications per project or operational needs (Yocto, bash shell)
 - Perform ongoing performance tuning, hardware upgrades, and resource optimization as requiredAchievement:
 - Lead a internal team with 5 members to auto checking and updating the patch files for CIP platform based on Yocto, bash shell for Renesas Japan
 - Lead a team with 20 outsourcing members from FPT for testing the CIP
 - Maintain the kernel 4.4.1
- 3/2015-8/2016 Researcher at Dankook University Korea
Working on creating Machine learning model, making the insightful and supervised application.
 - Develop the social media analysis applications (e.g., GeoSocial-Boundary, Detetecting human, spammer, and bot on the social network, sentiment analysis) by using R program.
 - Develop IoT applications (e.g., Demo of smart home, smart car; Object tracing and detecting; lane detection applications)Achievement:
 - Published two international conference and one journal papers
 - Obtained fund from Brain Korea 21+ (22K), NRF (30K), MSIP (6K).
 - Lead a team with 5 members to develop the demo of smart home, smart car, object tracing and lane detection with Raspberry Pi II
- 2012-2014 Researcher at Hanoi University of Science and Technology. Vietnam
Creating some applications for the Intelligence Transport System: (Automatically detect and trace a vehicle in the real time)
Achievement:
 - Researched, Designed and Integrated the RFID antenna prototype to the vehicle for identification in ITS .Problem: Project fund (15K) suspension caused prototype product
- 2009-2012 Internal information technology auditor at Tien Phong Bank. Vietnam
Manage the IT risk and create the security information technology internal audit campaign:
 - Create the risk table of information technology in the bank and the attack campaign to the core network.
 - Lead the information internal audit strategy in both Head-end and branch site office.Achievement:
 - Predict, detect, and prevent the potential risk (e.g., practical attack Data Recovery Sites, Recheck the verification and authorization policy), in the core banking which helped the system avoid to lose much money (almost 10M)
 - Lead team (5 members) of developing Controller Internal Audit platform (build the library risks, matching the procedure and risks, monitor the progress working of auditor, make the plan and generate the management report)

Scholarship

- 2018 Mathematics of Information Technology and Complex Systems (Mitacs) : Fund for Basic Science Research Program in collaboration with industrial partner.
- 2016 National Research Foundation of Korea (NRF) and Ministry of Science, ICT& Future Planning (MSIP) : Fund for Basic Science Research Program.
- 2015 Brain Korea 21+ Program.
- 2009 Samsung Electronic Vietnam Scholarship for the Excellent 5th Year-Student of HanoiUniversity Of Sience and Technology .
- 2008 Panasonic Scholarship : Pannasonic-Sponsored Class For Embedded Software Development .
- 2004 Hanoi University Of Sience and Technolog scholarship: Scholarship for Excellent Student From 2004 to 2009 .

Social activities

- AI for Enterprise speaker at AI4VN, 2023
- Volunteer of a snow man in Santa Claus Parade Montreal, 2022
- Data science Mentor of MacHacks, 2021
- Co-founder Vietnamese Technology (Viettech) Community in Montreal, Canada, 2019
- Volunteer of PMÉI - GRAND RDV des étudiants internationaux, 2017

Hobbies

- Commitment: Set the goal, approach the goal with an enthusiasm attitude
- Sport: Table tennis, Gym
- Music: Pop, R&B
- Communication: Community activities
- Reading: Books and news on the internet

Miscellaneous

- 2012-2014 Prize for people who has many contributions in the E-learning: Topica and ThanhGiong of Knowledge.
- 2018 Work with Korbit Inc which was one of top watching out startup in Canada 2020 with 5 persons and found by 2017 <https://betakit.com/canada-sees-improvement-from-2019-as-eight-canadian-startups-appear-on-cb-insights-ai-100>
- 2020 Korbit is one of the winners of enlightED Awards 2020 <https://www.enlighted.education/EN/enlighted-awards>
- 2020 Was nominated for the Mitacs award 2020
